

Research Organization:
College of Civil Engineering, Nanjing Tech University, China

Institution Representative: **Prof. Baofeng Huang**

Short Description of the Organization:

Nanjing Tech University was affiliated to Tongji University from 1913 to 1951. During the past 100 years of development, it won reputations in the society of civil engineering. It has 3 honor professors are the fellows of the Chinese academy, New Zealand, and Singapore, respectively. Three professors awarded the Thousand-talent National Expert Professor of China. There are 21 faculties whose research interests are focus on earthquake engineering. More than 200 academic projects from the Natural Science Foundation of China, Education Department, etc. have been completed. The total funding is more than 20 million US dollars. Many research results have been applied in actual infrastructure facilities such as Bay Bridge of Hongzhou, Air terminal of Kunming, metro system of Nanjing, and so on.

During the past 10 years, 20 shaking table tests has been performed to investigate the seismic performance of the nonstructural systems such as the building facade, nuclear power facilities, etc. More than 20 technical papers, 30 research reports, 40 patents, have been published, completed, and authorized.
