

Research Organization:

**Laboratory for Earthquake Engineering
National Technical University of Athens (NTUA)**

Individual Research Member:

Dr. Michalis Fragiadakis

Short CV:

Michalis Fragiadakis is Assistant Professor (Senior Lecturer) at the School of Civil Engineering of the National Technical University of Athens (NTUA), Greece. He received his PhD from NTUA and holds MSc degrees from NTUA and Imperial College, London. He has served as adjunct lecturer at the Department of Civil Engineering of the University of Thessaly and as a postdoctoral researcher at the University of Cyprus and the University of Pavia. His research activity is focused on earthquake engineering and on the seismic risk assessment of structures and lifelines. His interests also extend to computational methods in structural analysis and on the application of novel soft-computing methodologies for structural analysis and design. He is currently quite active on the seismic assessment of rocking building contents and on the development of novel methods for the protection of museum artefacts. Dr Fragiadakis is Treasurer of the Hellenic Society for Earthquake Engineering (HSTAM) and has been involved in many national and European research projects. He has been co-chairman of 5 international conferences and has co-organised a number of mini-symposia and special sessions in international conferences. He has authored and co-authored more than 150 publications, while his work is extensively disseminated.
